The Principle

```
var expected = "some string";  
var actual = "some other string";  
  
Assert.Equal(expected, actual);
```

Approval Tests Framework

Available for many **languages**:

- Java, C#, VB.Net, PHP, NodeJS, Python or Ruby.

Support most (may be all) **test frameworks/runners**:

- JUnit, NUnit, xUnit, NCrunch, rSpec, etc.

Many useful **reporters**:

- Diff reporters: Generic, AraxisMerge, P4Merge, KDiff, VisualStudioDiff, TortoiseDiff, WinMerge.
- CI: CruiseControl, TeamCity, Quiet.
- Misc: FileLauncher, Image, Clipboard.

Environment/Platform specific **approvals**:

- ASP.NET (WebForm/MVC), WPF, Rdlc Reports.

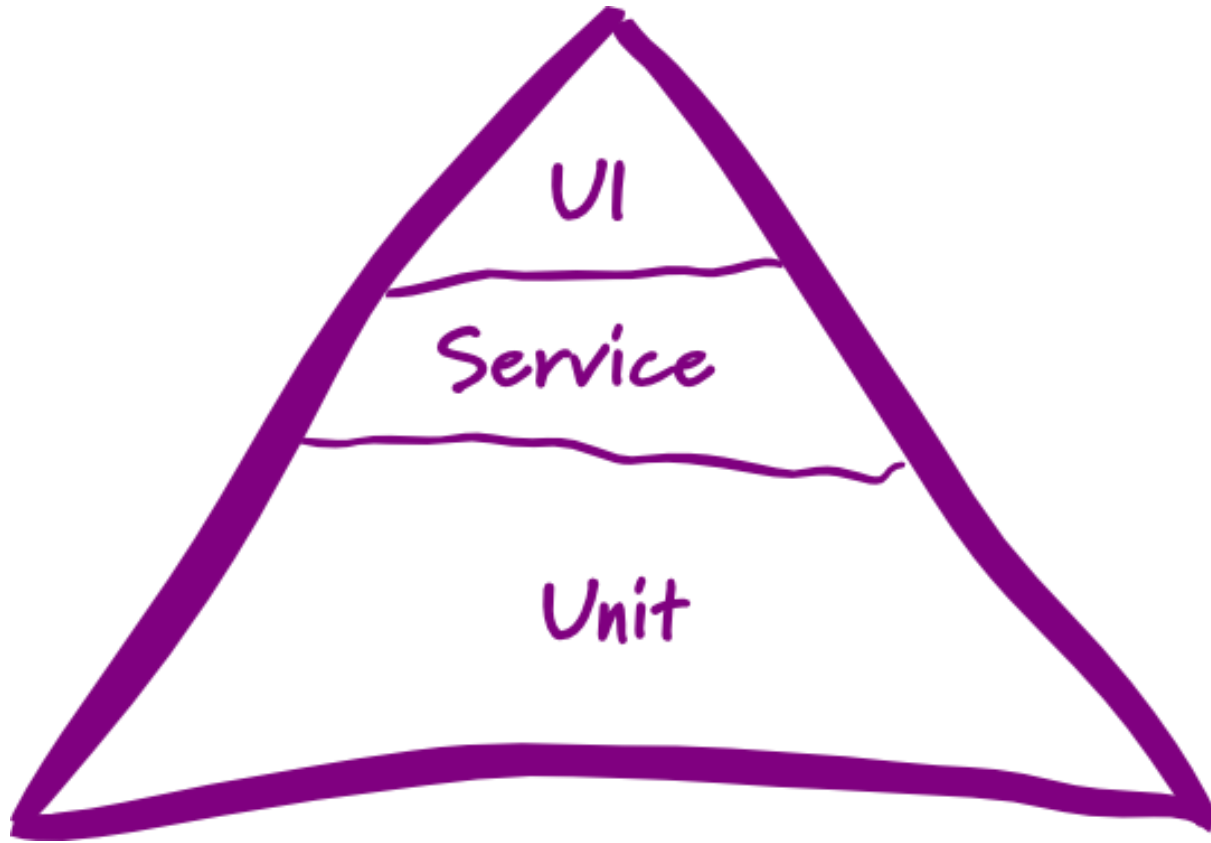

Unleash the power

Fight with Legacy Code
